- Creativity

Projects

Production of Buckwheat Cookies with formulation of plant based carbohydrate source.
With the changing lifestyle, nowadays people are more conscious about their health. So, the development of fortified cookies and other fortified products are becoming more in demand. There is large variety of ready to eat snacks which not only gives pleasure to our tongue but are healthy too. Cookies are one of them. The rise in the demand of these products is due to their nutritional improvements. The present study was undertaken with the objectives to swap the use of Maida with a plant based carbohydrate source – Glucidex.
